

ParcelMap BC Adoption Made Simple: Best Practices and Real-World Lessons

LTSA/ICI Society Virtual Café

January 29th, 2026

Agenda

- Opening remarks: Steve Mark - Director of Operations, ICI Society (5 minutes)
- ParcelMap BC Update: Sven Boesen – Director of Property Solutions Products, LTSA (5 minutes)
- City of Colwood: Brian Goble – Case Study (5 minutes)
- Open Forum- Questions and Answers (50 minutes)

Facilitators & Panelists/Presenters

- Facilitator/Chat Monitors:
 - Steve Mark (Director of Operations, ICI Society) – MC/Facilitator
 - Shelby Logan (Communications Engagement Coordinator, ICI Society) – Chat Monitor
 - Taylor McInnes (Manager, GeoData Services, LTSA) – Chat Monitor
 - Sven Boesen – (Director, Products, Property Solutions, LTSA)
- Presenter/Panelist:
 - Brian Goble - Manager of GIS Data, City of Colwood (Presenter)
 - Nicole Jung - GIS Supervisor, Thompson-Nicola RD (Presenter)
 - Brendan Pauls – GIS Specialist, Urban Systems (Panelist)
 - Stefanie Wenker - Business Systems Analyst, City of Kelowna (Panelist)
 - Mark Harris – BC Assessment, GIS Analyst (Panelist)

Colwood

- **Configuration:**
 - Tempest Land (8500+ records).
 - GIS Parcels (8500+ polygons) including roads (Interest), detailed strata lots, and proposed parcels (1400+ polygons). Additional “Interest” polygons for SRW, Easements, Covenants, *etc.* in separate polygon layer.
 - GIS Parcels linked to Tempest Land database with [GISLINK] attribute for use in web maps.
 - Detailed geometry of strata lots essential for business processes in Tempest are included in the GIS Parcels geometry.
- **Parcel Updates:**
 - Weekly data delivery from ICI Society GeoShare of ParcelMap BC (PMBC) and BCA polygons.
 - Daily updates from LTSA of Title Updates for import into Tempest Land.
 - Weekly updates from BC Assessment for import into Tempest Land.
 - Updates of Legal Plans from LTSA by email after plan registration.

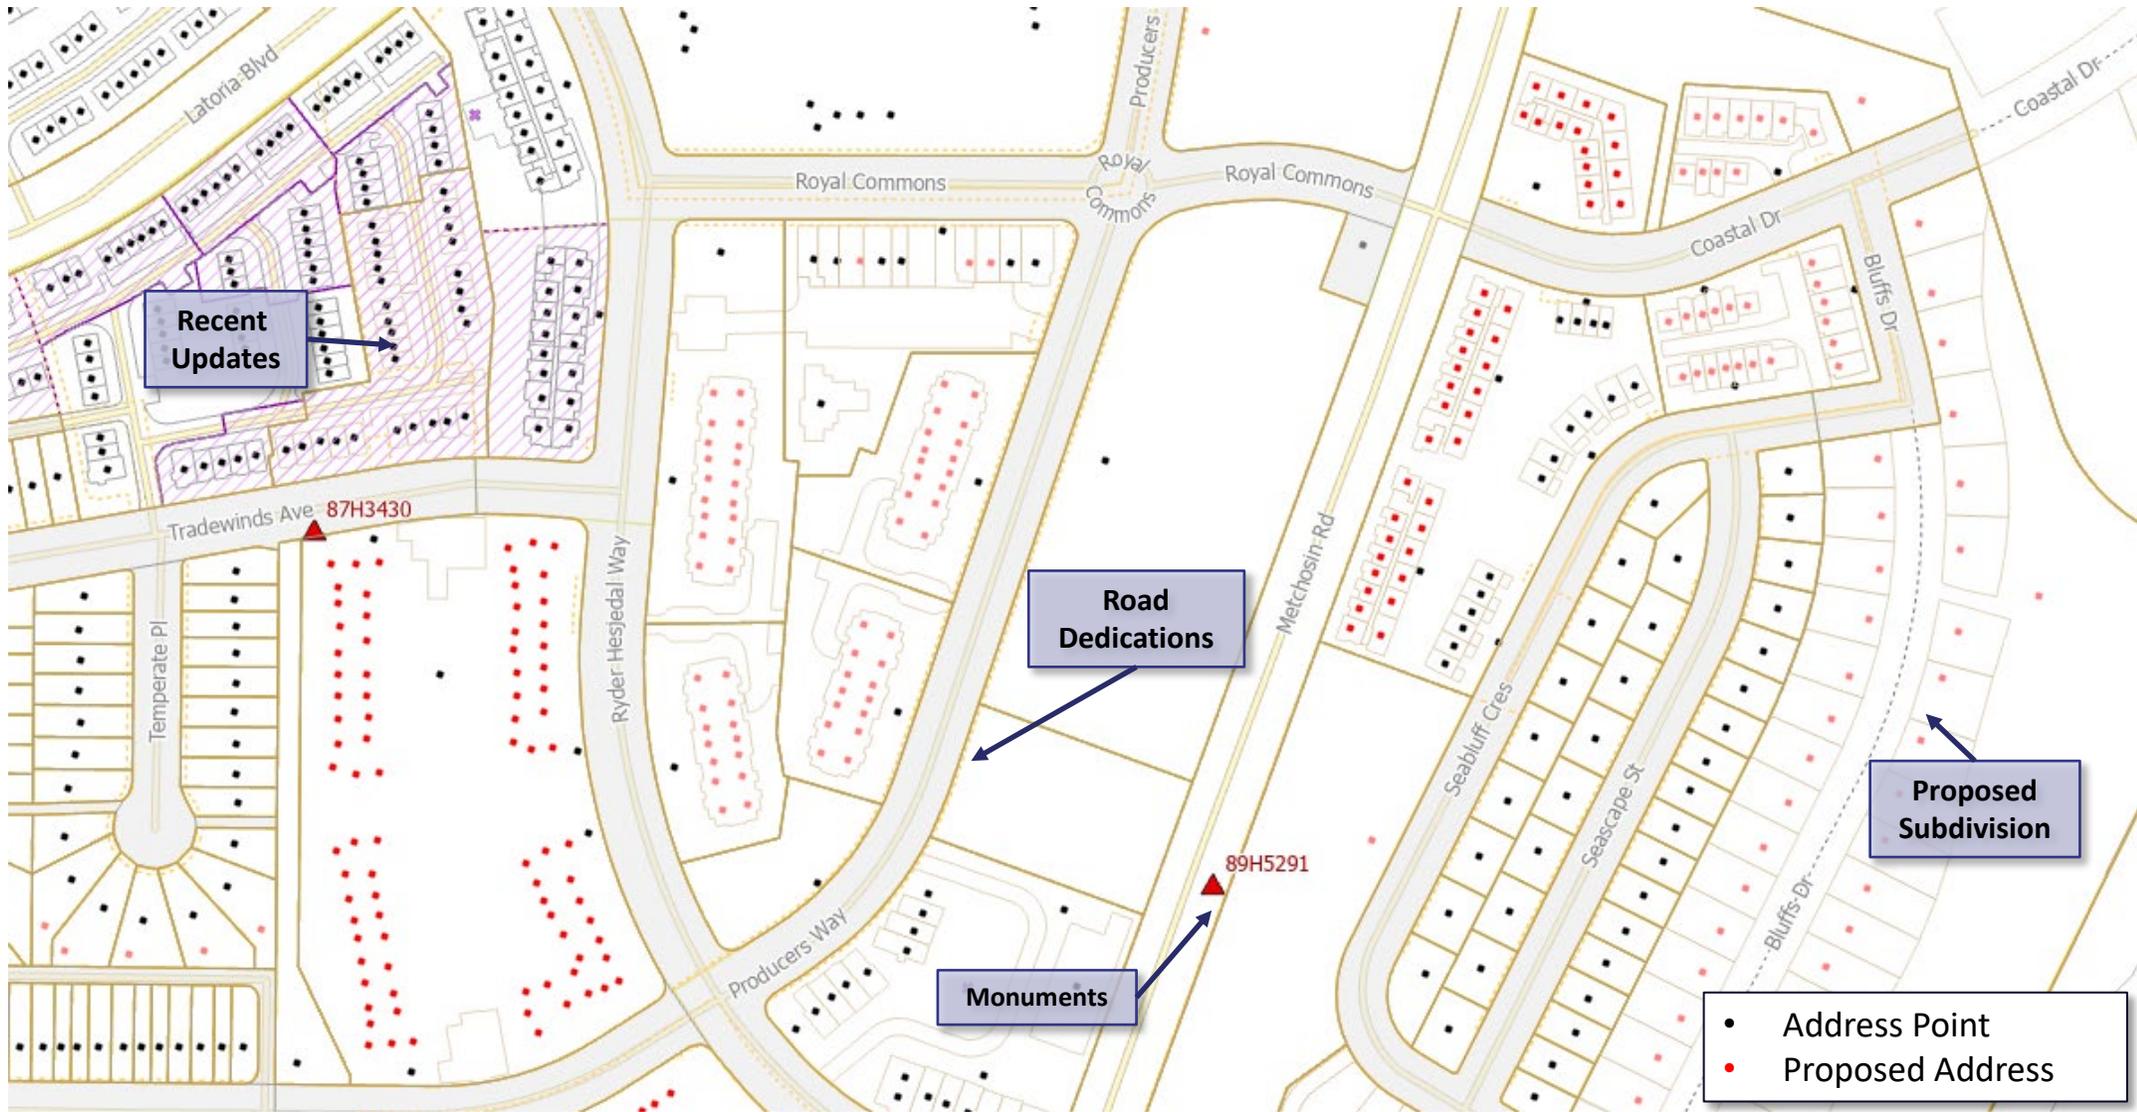

Colwood

GIS Parcel Update Process:

- Pre-subdivision plans help prepare “proposed parcels” and allocate “proposed addresses.
- A script/model imports GeoShare PMBC features into GIS database to dedicated PMBC layers.
- Update GIS Parcels from legal plans (PDF), LTSA updates for Tempest, and ParcelMapBC feature updates. Attribution into GIS from PMBC (PID, Legal, etc.) and BCA (Tempest) data.

Advantage of separate GIS Parcel layer:

- Updates unaffected by timing of data. Information updated to GIS Parcel when received.
- Business attributes from other business modules included in GIS Parcel (e.g., Actual Use, Tempest Attributes, Classifications, etc.)
- ***NOTE: Updates and Queries sent to ParcelMapBC Support receive quick response and resolution.***

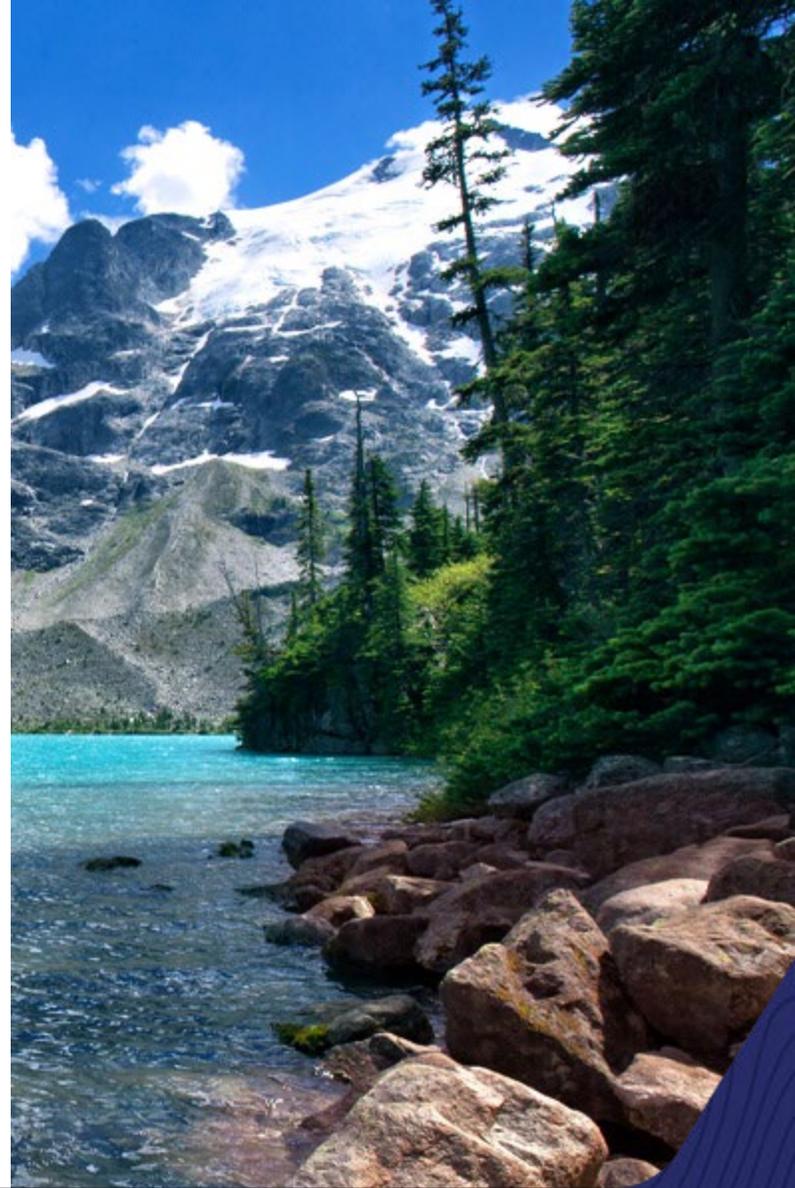

ParcelMap BC Resources:

- [Adoption Resources & Tools](#)
- [Data Products & Descriptions](#)
- [Webinars & Workshops](#) (slides & videos)

ICI Society Resources:

- The ICI Society distributes customized PMBC Geoshare packages to our members, tailored to your area of interest, on a weekly refresh.
- Additional layers, such as third-party utility data, can also be added to your Geoshare package.
- If you would like to make any changes to your current package or have questions about receiving one, please contact us at info@icisociety.ca

Thank You for Participating!

Video recording & slide deck will be posted soon!
